

VESSEL MODIFICATION & REFIT

MODIFICATION & REFIT PACKAGES

15+

With over 15 years' experience in vessel modification & refit services, we take the hassle out of your project.

Our dedicated, highly qualified team have a diverse background, enabling us to offer 360° support.

We mobilise quickly, offering flexible onsite support, worldwide, at short notice.

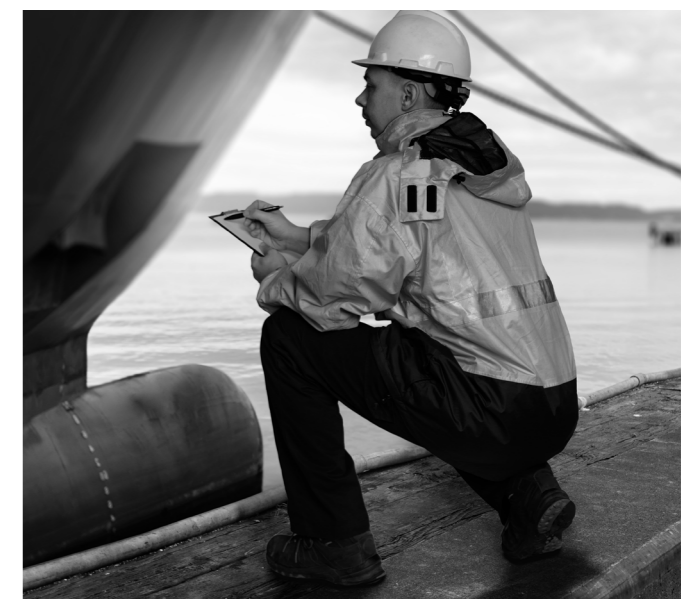

Offshore Operations (OOL) offers a full refit scoping and modification design package through our team of Naval Architects, Marine Engineers and Project Managers, as well as through collaboration with our sister company, Rockabill Marine Design (RMD).

Whether you are looking at re-powering, structural modification, class change, HS-OSC, or a life extension refit, our highly qualified and experienced team can help.

As part of the CSO Marine Group, OOL and RMD collaborate to offer a range of services to support all aspects of refits and vessel modification. These include:

- Refit, repair and modification scoping, including feasibility study and scope of work creation.
- Re-powering, hybrid and zero-emissions conversions, including feasibility study and system.
- Vessel structural design, whether you are looking to simply add equipment or significant modifications.
- Vessel gap analysis for class and flag state requirements, including HS-OSC conversion .
- Stability booklets, stability assessments, and analysis for impact and damage.
- Lightship surveys and inclination tests.
